# Custom Made Knife

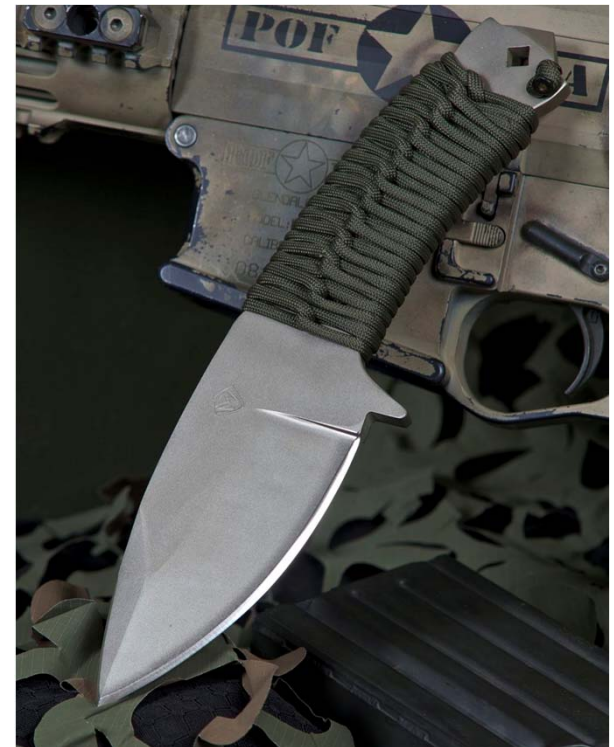

- Greg Medford is a former Marine and air show pilot who's love for knives has led him to turning his hobby into his job. A hand-to-hand combat expert and martial arts instructor, Greg makes some of the finest knives on the market today.

Specifications:

Blade Length-3 7/8" Overall Length-9 1/4" Thickness-.250" (1/4")

Pictured in NP3 muted finish and O.D. para cord wrapped handle. The TSP-1 is a land, air & sea warfare design for intense utility and combat use. This blade has particularly excellent spearing and slicing qualities. The CQC potential of this blade for combat soldiers is excellent. The pommel is tapered for hard pointed striking (windows or skulls, your choice). The wrench square hole is standard and very handy in a pinch. These blades are made of D-2 and S30V steel and hardened in our shop to 65 on the Rockwell-C scale. The blades are drawn twice to 59-60C and Cryogenically treated for additional edge retention between draws. All blades are Rockwell tested at every major stage of manufacturing and your blade will have a quality control, testing and certificate detailing its history when you receive it. As with all our knives we believe knives for land use are best made from a carbon steel that hold an unparalleled edge and require minimal care such as an occasional light oiling. This blade is available in D2 and S30V. We recommend the blade in high carbon tool steel for land use environments like Iraq, Afghanistan and most of North America and Europe. S30V is for marine environments and moist climates. This TSP-1 may be false edged but may be sharpened on the top of the blade, as it is set up for stabbing, standard slicing and hard striking. This knife is made of .250" stock and the thought of breaking or bending this blade with unaided human force is nearly unimaginable. This blade is available with all of our customizable options and includes a standard Kydex holster with integral belt loop, MOLLE, Bladetech or other customizable mounting hardware. \$415 is the distributor wholesale base price for Para-chord wrap and standard holster. Suggested retail is \$695. Visit us at [medfordknife.com](http://medfordknife.com) to see our wide selection of Knives and tools.

This blade for auction is carbon tool steel D-2 and pictured here
